

XNote Extension

AI-Powered Chrome Extension for Intelligent Productivity

Overview

XNote Extension transforms your browser into an intelligent productivity workspace. Featuring a convenient sidebar interface accessible via **Ctrl/Cmd+G**, it provides multi-functional AI tools, secure cloud synchronization, and seamless web integration.

Key Features

AI-Powered Chat Interface

- Multi-provider LLM support: OpenAI (GPT-4/3.5), Google Gemini 2.0 Flash, DeepSeek
- Real-time streaming responses with syntax highlighting for code blocks
- Chat history management: Save, load, delete, and export conversations
- Google Drive export with automatic timestamps
- Markdown rendering with proper formatting

Screen Capture & Visual AI (OCR)

- Area selection screenshot tool with overlay interface
- AI-powered text extraction using vision-capable LLM providers
- Custom analysis prompts: Extract, translate, or analyze visual content
- Support for complex diagrams, charts, and code screenshots

Intelligent Web Summarization

- One-click summarization via context menu
- AI-powered auto-categorization for organization
- Google Drive integration with smart folder structure
- Favorites system with star ratings

AI Translation Service

- Real-time translation with streaming responses
- Context-aware translations preserving technical terminology
- Multiple language support via AI providers

Quick Links Manager

- Category-based organization for bookmarks
- Context menu integration for saving pages

- Edit mode for bulk management

Google Drive Integration

- Automatic synchronization with configurable intervals
- Smart folder organization: XNote/chats/, XNote/summaries/, XNote/translations/
- OAuth2 authentication via Chrome Identity API

Technology Stack

Category	Technologies
Frontend	Vue 3.3+ (Composition API), Vite 5.0+, Pinia
Extension	Chrome Manifest V3, Side Panel API
AI Providers	OpenAI, Google Gemini, DeepSeek
Security	Web Crypto API (AES-GCM-256), Chrome Sync Storage
Cloud	Google Drive API for synchronization

What Makes XNote Unique

Dual-Mode Architecture

Works as Chrome extension OR standalone web app with automatic detection

Multi-Provider LLM

Switch between providers instantly with no vendor lock-in

Intelligent Organization

AI-powered auto-categorization with smart folder structures

Privacy-First Design

All encryption happens locally - your keys, your data

Getting Started

1. Install the extension from Chrome Web Store or build from source
2. Open the sidebar with **Ctrl+G** (Windows/Linux) or **Cmd+G** (Mac)
3. Configure your preferred LLM provider in Settings

- 4. Connect Google Drive for cloud synchronization (optional)
- 5. Right-click on any webpage to access summarization features

Performance

Metric	Value
Initial Load	< 100ms
First AI Response	< 500ms
Screenshot Capture	< 1 second
Memory Usage	50MB idle, 150MB active
Encryption	< 10ms for API keys
